**General Electric**  
**MASTR<sup>®</sup> MPR Personal Radios**  
Quality that speaks for itself

The radio everyone else  
will be trying to imitate

Simply put, the MPR Personal radio is in a class by itself. No comparable radio begins to approach its sophistication, its specs or its extraordinary capabilities. Technologically, the MPR Personal is the state-of-the-art personal. And will be for years to come.

Just use it and you'll see it has more features, more functions and more flexibility than any other hand-held radio.

Totally new, thick-film hybrid integrated circuitry, for instance. Plug-in modular design and multi-layer circuit board, resulting in minimum wiring and easy field expansion. Vastly superior audio quality in a highly advanced receiver. An electronics package that floats inside an Ensolite® foam shock-protected casing. Field-programmable synthesized Channel Guard tones

plus squelch tail elimination. Large side-mounted connector for highly reliable connections to options and accessories.

Additional options make the MPR Personal even more versatile. Options like up to 10-channel capability. Desk and multi-unit chargers, plus a vehicular charger capable of operating the transmitter even when the MPR radio battery is discharged. A wide selection of antennas, batteries, carrying and audio accessories for unprecedented application versatility. Plus three case sizes to contain just the functions needed for your particular requirements.

The MPR Personal. It's so advanced, it's like a high-technology MASTR II mobile you hold in your hand.

*Note: Some models are shown with optional equipment*

### Performance Characteristics

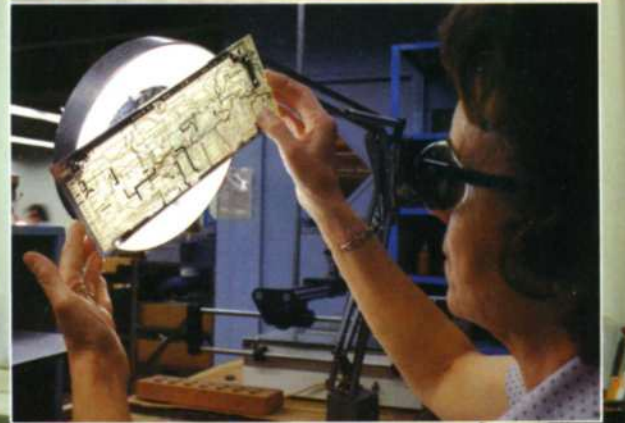

**Output Powers**—Up to 6w

**Frequency Bands**—VHF, UHF

**Number of Channels**—Up to 10

# Quality begins with people

People like our product design, inspection, test and manufacturing personnel, who help maintain the industry's most stringent quality-control standards.

People like our sales and service representatives. Permanent residents of the area they serve, they're uniquely prepared to provide responsive, professional, on-the-spot service and support. When you need it.

People, in short, who will stay with you and work for you. That's what makes the General Electric team part of your team.
