

This is from *Feedback* – January 1958.

Incidentally for those who might be curious, Liverpool is a suburb of Syracuse. The Charles Building location is within two miles of Electronics Park. Due to the rapidly expanding developments in electronics, the "Park", as it is commonly known, simply cannot hold us all. Periodically different segments of the electronics business outgrow their quarters and are spun off on their own. It is significant that the Communications business has expanded so that we were among those who outgrew our space. This is why we have had to establish residence in the Charles Building.

As we now stand:

- Engineering: is still based at Electronics Park, Syracuse. N. Y.
- Manufacturing: is based at Utica, N. Y , and Redwood City, Calif. , with a little still at Electronics Park .
- Order Processing is based at New York Mills, a suburb of Utica, N. Y.
- Marketing is based at the Charles Building, Liverpool, N. Y.
- Crystal Manufacture: is based at Clyde, N. Y.
